Research papers

Conditional Gaussian co-simulation of regionalized components of soil variation
G. Larocque, P. Dutilleul, B. Pelletier and J.W. Fyles 1

An optical analysis of the organic soil over an old petroleum tar deposit
S. Gillet and J.-F. Ponge 17

No-tillage and manure applications increase aggregation and improve nutrient retention in a sandy-loam soil
Y. Jiao, J.K. Whalen and W.H. Hendershot 24

Quantification of visual soil erosion indicators in Gikuuri catchment in the central highlands of Kenya
B.O. Okoba and G. Sterk 34

Low-temperature SEM imaging of polymer structure in engineered and natural sediments and the implications regarding stability
R.G. Perkins, I.R. Davidson, D.M. Paterson, H. Sun, J. Watson and M.A. Player 48

Fractal characteristics of soils under different land-use patterns in the arid and semiarid regions of the Tibetan Plateau, China
X. Wang, M.-H. Li, S. Liu and G. Liu 56

Pedogenesis and clay mineralogical investigation of soils formed on gypsiferous and calcareous materials, on a transect, southwestern Iran
H.R. Owliaie, A. Abtahi and R.J. Heck 62

Pore structure changes during decomposition of fresh residue: X-ray tomography analyses
S. De Gryze, L. Jassogne, J. Six, H. Bossuyt, M. Wevers and R. Merckx 82

Evaluation of soil compaction using hydrodynamic water content variation: Comparison between compacted and non-compacted soil
A. Alaoui and A. Helbling 97

Interactions between mineral phases in the preservation of soil organic matter
C.L.S. Wiseman and W. Püttmann 109

Heavy metal content in soils of Réunion (Indian Ocean)
E. Dœlsch, V. Van de Kerchove and H. Saint Macary 119

Performance evaluation of methods for the estimation of soil hydraulic parameters and their suitability in a hydrologic model
N. Islam, W.W. Wallender, J.P. Mitchell, S. Wicks and R.E. Howitt 135

Variation of soil and site parameters on extensively and intensively grazed hillslopes in semiarid Cuba
A. Wezel 152

Tensile strength of sand, palygorskite and calcium carbonate mixtures and interpretation with the effective stress theory
M.R. Mosaddeghi, M.A. Hajabbasi and H. Khademi 160

The effect of kauri (*Agathis australis*) on grain size distribution and clay mineralogy of andesitic soils in the Waitakere Ranges, New Zealand
A.G. Jongkind and P. Buurman 171

Kriging on highly skewed data for DTPA-extractable soil Zn with auxiliary information for pH and organic carbon
J. Wu, W.A. Norvell and R.M. Welch 187

Estimations of soil organic carbon storage in cropland of China based on DNDC model
H. Tang, J. Qiu, E. Van Ranst and C. Li 200

Spatial variability of soil compaction over a vineyard region in relation with soils and cultivation operations
P. Lagacherie, G. Coulouma, P. Ariagno, P. Virat, H. Boizard and G. Richard 207

Detecting salinity hazards within a semiarid context by means of combining soil and remote-sensing data
A.E.K. Douaoui, H. Nicolas and C. Walter 217

Discussion
Comment on "Soil structure and management: A review" by C.J. Bronick and R. Lal
P. Baveye 231

Book review 233

Contents Volume 134, 2006 235

Special Issue

Fractal Geometry Applied to Soil and Related Hierarchical Systems - Fractals, Complexity and Heterogeneity

Edited by

M.A. Martín, E. Perfect and Y. Pachepsky

Fractal geometry applied to soil and related hierarchical systems
Y. Pachepsky, E. Perfect and M.A. Martín 237
Multifractal Sierpinski carpets: Theory and application to upscaling effective saturated hydraulic conductivity
E. Perfect, R.W. Gentry, M.C. Sukop and J.E. Lawson 240
Information content and complexity of simulated soil water fluxes
Y. Pachepsky, A. Guber, D. Jacques, J. Simunek, M.Th. Van Genuchten, T. Nicholson and R. Cady 253
Mathematical modelling of leaching by irregular wetting fronts in chemically heterogeneous porous media
M.A. Martín 267
A new type of stochastic fractal for application in subsurface hydrology
F.J. Molz and P.D. Hyden 274
A program for fractal and multifractal analysis of two-dimensional binary images: Computer algorithms versus mathematical theory
E. Perrier, A.M. Tarquis and A. Dathe 284
Experimental characterization of hydration and pinning in bentonite clay, a swelling, heterogeneous, porous medium
A. Brú and J.M. Pastor 295
Selfsimilarity of pedotaxa distributions at the planetary scale: A multifractal approach
J. Caniego, J.J. Ibáñez and F. San José Martínez 306
Multifractal analysis of the pore- and solid-phases in binary two-dimensional images of natural porous structures
A. Dathe, A.M. Tarquis and E. Perrier 318
Particle-size distribution in soils: A critical study of the fractal model validation
R.R. Filgueira, L.L. Fournier, C.I. Cerisola, P. Gelati and M.G. García 327
A comparison of fractal analytical methods on 2- and 3-dimensional computed tomographic scans of soil aggregates
J.R. Gibson, H. Lin and M.A. Bruns 335
Comparison of gliding box and box-counting methods in soil image analysis
J. Grau, V. Méndez, A.M. Tarquis, M.C. Díaz and A. Saa 349
Mathematical structures of biological and pedological taxonomies
J.J. Ibáñez, M. Ruiz-Ramos and A.M. Tarquis 360
Multifractal characterization of saprolite particle-size distributions after topsoil removal
J.G.V. Miranda, E. Montero, M.C. Alves, A. Paz González and E. Vidal Vázquez 373
Fractal analysis of soil water hysteresis as influenced by sewage sludge application
G. Ojeda, E. Perfect, J.M. Alcañiz and O. Ortiz 386
On measuring the fractal anisotropy of 2-D geometrical sets: Application to the spatial distribution of fractures
R. Pérez-López and C. Paredes 402
Inter-scale behavior of balanced entropy for soil texture
J.-M. Rey, E. Montero and M.A. Martín 415

Effect of tillage on fractal indices describing soil surface microrelief of a Brazilian Alfisol
E. Vidal Vázquez, J.G.V. Miranda, M.C. Alves and A. Paz González 428
Characterizing scale-dependent spatial relationships between soil properties using multifractal techniques
T.B. Zeleke and B.C. Si 440
